Digital Bazaar - QLD, Australia

Shift Supervisor

Mar 2022 - Nov 2022

Rashays Talent - QLD, Australia

Web Developer

Nov 2021 - Mar 2022

Handle-it Design - DF, Brazil

Data Security Internship

Feb 2020 - Dec 2021

State's Civil Police - DF, Brazil

Projects

- Use of **React JS** to create "The Safe", a financial tracker application where I handled React **Hooks** like useEffect, useRef and useState to create reactive and unique states of elements. Construction of a Global Storage of data in order to spread all useful information through a **Context** with useContext.
 - Use of several **JavaScript** functionalities in "Fantastic Animals" divided into JS **Modules** such as Mobile Menus, Tab Navigation, Modals, Tooltips, Mutations and a variety of page Animations in a clear and modern syntax.
 - Robust experience with **HTML/CSS** to create "Giancarlo", a traditional fancy restaurant. Built using variables and mixins from **SASS/SCSS** to recycle code along with a faster development process.
-

Specific Skills

→ React

Components, Hooks, Custom Hooks, useReducer, Contexts, Forms, CSS Modules, React-Router-Dom.

→ JavaScript
